PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 5+ years building production web applications end to end in TypeScript: Node.js and NestJS REST APIs, PostgreSQL and SQL Server databases, and Angular and React front ends. Most recently, through Ravn, built shared UI components for Lucid Software's Lucidchart and Lucidspark (70M+ users) and delivered WCAG 2.2 accessibility work that contributed to Lucidchart's VPAT. Previously delivered five client projects for banking, retail, and automotive companies in Central America, including Sherwin-Williams and Banco Integral, as the main technical point of contact. Fluent in English, based in El Salvador (UTC-6) with full overlap with US Central and Eastern hours, and available immediately for remote contractor (W-8BEN) or full-time roles.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), SQL, HTML5, CSS3, SCSS

Backend: Node.js, NestJS, REST APIs, WebSockets (real-time), Authentication & Authorization, Client-Server Architecture

Frontend: Angular, React, Next.js, RxJS, Design Systems, Component Libraries, Responsive Design

Databases: PostgreSQL, SQL Server, MySQL, Data Modeling

DevOps & Tools: Docker, Git, GitHub Actions, CI/CD, Figma

Accessibility: WCAG 2.2, ARIA, VPAT, Accessible Component Design, Cross-Browser Compatibility

Practices: Agile/Scrum, Performance Optimization, Requirements Gathering, Stakeholder Communication, AI-Assisted Development (Claude Code)

PROFESSIONAL EXPERIENCE

Software Engineer

Nov 2024 – Jul 2026

Ravn — client: Lucid Software (Lucidchart, Lucidspark) · Remote (Utah, USA)

- Built and maintained shared UI components used across Lucidchart and Lucidspark, visual collaboration products serving **70M+ users**, as part of the core components engineering team.
- Implemented WCAG 2.2 accessibility improvements across core product flows, contributing to Lucidchart achieving its **VPAT** (Voluntary Product Accessibility Template).
- Shipped features and resolved production defects in a large Angular and TypeScript codebase, improving design-system scalability, performance, and code quality.
- Collaborated daily in English with a fully distributed US engineering team.

Full-Stack Developer Analyst

Mar 2022 – Oct 2024

ORIGEN Cowork — software consultancy · San Salvador, El Salvador

- Delivered **5 client projects end to end** (2 full-stack, 3 frontend) for banking, retail, and automotive clients across Central America using Angular, NestJS, Node.js, PostgreSQL, and SQL Server.
- Built REST APIs with NestJS and Node.js on PostgreSQL, integrated with responsive Angular front ends.

- **Sherwin-Williams Central America:** MasterStores (store operations platform with employee management, asset tracking, and interactive location maps), SmartCredit (credit applications with document uploads, e-signatures, and regional KPIs), and ColorTrack (paint-formula logging with real-time order notifications from a mobile app).
- **Banco Integral:** MyCallCenter, a customer support module with secure authentication and account access for call center agents.
- **Apicar (apicar.app):** vehicle import platform that calculates the total cost of US auction vehicles (Copart, IAAI) from specs, taxes, and logistics; live in production with thousands of listings.
- Led requirements gathering, UX/UI collaboration, and client presentations as the main technical point of contact; ran delivery under Scrum (sprint planning, demos, stakeholder updates) from discovery to production.

Full-Stack Developer Analyst

Feb 2021 – Feb 2022

Creativa Studio — digital agency · San Salvador, El Salvador

- Developed La Placita Market, an eCommerce platform with product catalog, category filtering, cart, and checkout flows, using Angular, Node.js, and PostgreSQL.
- Built a real-time order-tracking dashboard with monthly sales analysis; integrated a secure payment gateway and newsletter campaigns.

Bilingual Customer Service & Sales Agent

Jan 2019 – Jan 2021

Teleperformance — AT&T account · San Salvador, El Salvador

- Resolved technical and billing inquiries for US customers entirely in English, the foundation for daily communication with US clients and distributed teams.

PROJECTS

- **Pupas App** (pupas.app) — Live web app that fixes group pupusa orders: share a group link, everyone adds their order, and the consolidated order goes out via WhatsApp, with no accounts needed. Built end to end with Next.js and React using AI-assisted development.
- **La Fogata** (github.com/NoahLara/la-fogata) — In progress: open-source, anonymous, real-time community web app in TypeScript, designed with WebSocket presence, LLM-based content moderation, and WCAG 2.2 AA accessibility.

EDUCATION

Bachelor's Degree in Software Engineering (Ingeniero de Software)

2019 – 2024

Universidad de El Salvador · San Salvador, El Salvador

LANGUAGES

English: Fluent (professional working proficiency) · **Spanish:** Native
